

N2XSEY (E-2XHCEY)**Three-core XLPE Insulated Cable with PVC Outer Sheath**

according to DIN VDE 0276-620 / ÖVE - K620

**Construction**

Conductor of stranded bare copper wires, inner layer of semi-conducting material, insulation of cross-linked polyethylene (XLPE), outer layer of semi-conducting material, semi-conducting tape, copper wires and copper tape applied helically over each individual core, inner covering over laid-up cores, red PVC outer sheath with normalised marking and meter marking.

Application

To be laid directly in ground, in water, outdoors, indoors and in cable ducts e.g. in industrial and switchboard plants.

Temperature range

- 5°C till + 70°C

Admissible conductor temperature + 90°C

Admissible short circuit temperature + 250°C

(for the duration of max. 5 s)
